

NeoSponge™ by Acor®

Durable Synthetic Rubber

Acor NeoSponge™ is a porous, synthetic rubber material designed to flex, have great durability, and be resistant to breakdown by water. It is form fitting and resilient. The many uses of NeoSponge™ include: elbow and knee pads, orthopedic braces, and orthotics. Acor offers three styles of NeoSponge™ - with blue or black fabric, with an X-Static® top cover, and with a new BambooLite™ top cover.

New Sheet Sizes

Acor® NeoSponge™

Composition: Neoprene Rubber

Molding Temperature: Not moldable

Grindable: Yes

Sheet Sizes: 47"x 75" Full Sheet, 47"x37.5" Half Sheet, 5"x12" Strips (MOQs apply)

ACOR® Bamboo + NeoSponge®

**BambooLite™ - Bamboo + NeoSponge™**

BambooLite™ is laminated Acor NeoSponge™ with an improved ultra-durable bamboo fabric cover. This long wearing, natural, anti-bacterial and odor neutralizing material offers outstanding cushioning. Tough on impact and shear, with breathable and porous properties, BambooLite™ is a perfect option for the most active user.

X-static® + NeoSponge™

X-Static® + NeoSponge™

X-Static® + NeoSponge™ is laminated Acor neoprene with a pure silver fiber woven directly into a fabric top cover material that offers superior benefits of antibacterial and antifungal properties seldom found in the orthotics and prosthetics industry. Ideal for top covers and liners, X-Static® + NeoSponge™ sets the silver standard for antibacterial and antifungal materials.
