

California® Compression Orthosis is a low-profile lumbar orthosis that provides maximum abdominal support with one easy pull. Its one-handed compression pull tab makes application simple and quick. Breathable, comfortable mesh fabric minimizes heat buildup common with other spinal orthoses.

Indications include acute and chronic low back pain, spondylolisthesis and post-op low lumbar laminectomy. Its lightweight construction is optimal for patients requiring support for everyday activities such as lifting, long periods of standing, work related motions, golf and gardening.

Size	Model #		
	8" Belt	10" Belt	Waist Circ.
X-Small	3199	3209	25"-30"
Small	3200	3210	30"-35"
Medium	3201	3211	35"-40"
Large	3202	3212	40"-45"
1X-Large	3203	3213	45"-50"
2X-Large	3204	3214	50"-55"
3X-Large	3205	3215	55"-60"
4X-Large	3206	3216	60"-65"

California® Low Profile Orthosis is a totally modular spinal system that provides stability and abdominal support without compromising respiration or interfering with activities of daily living. The compound closure system is adjustable for both circumference and waist/hip development. This orthosis is symmetrically shaped and represents a solution to one of the most difficult problems in spinal bracing—superior migration.

Indications include acute and chronic low back pain, post-operative support, and activity-related low back pain. It can be effective for patients that have problems tolerating xiphoid height spinal systems, e.g., obese patients, those with a short stature, women in late pregnancy and patients with respiratory problems.

Size	Model #	Waist Circ.	Posterior Shell Height	Posterior Pad Height
