

We're all about  
**Adjusting.**

CLICK

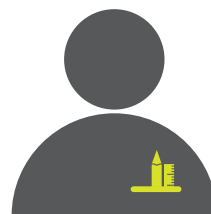

**Adjusting** fit.  
**Adjusting** comfort.  
**Adjusting** your business.

## Practitioners

Can create devices with a broad range of fit, allowing delivery of the right fit, the first time.

## Technicians

Can reduce the amount of remakes, saving time and money.

## Patients

Experience better fit, device performance and all day comfort.

Why  
**adjustability?**

Solutions for  
**building in adjustability.**

**Click's Revo™ solutions enable practitioners to fabricate adjustable prosthetic and orthotic devices.**

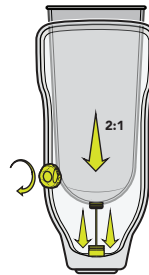

## RevoFit™

Transfemoral

*Transtibial*

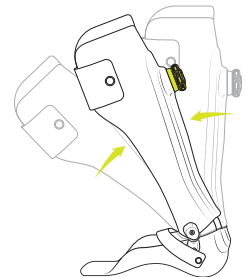

Build on-demand targeted  
adjustability anywhere on a socket.

**RevoLock™**

Build an easy way for patients to draw their limb into a socket by using two fingers and a twist.

## RevoFlex™

Build an adjustable  
range of motion AFO  
for progressing a patient  
through therapy.

Solutions for  
**adding on  
adjustability.**

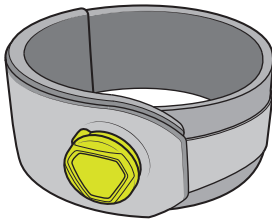

# Click's **QuickFit™** solutions enable practitioners to quickly add micro-adjustability to prosthetic or orthotic devices.

## **QuickFit™**

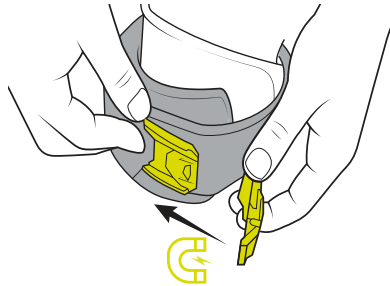

Strap

Add quick and easy micro-adjustability that doesn't wear out. The next evolution of the Velcro Strap.

## **QuickFit™**

Buckle

Add a self-locating magnetic QuickFit buckle to the QuickFit strap for even easier and long-lasting usability.

## **QuickFit™**

Lacer

Add one-handed adjustability so patients can tension a cuff or tie their shoes in seconds.

# CAN YOU ADJUST?

Educational Series

## HAPPIER PATIENTS. BETTER BUSINESS. ADJUSTABLE SOCKETS.

Sign up for Click Medical's **CAN YOU ADJUST?** Educational series.  
Based on our innovative RevoFit™ adjustable technology, you will:

- Become a prosthetic adjustability expert
- Get free check socket kits
- Improve patients' lives
- Make more money

"Providing a patient with adjustability empowers them to make minor adjustments themselves. This means we can see more new patients."

Angela J. Bryl, CPO - Clinical Director, Dankmeyer Prosthetics & Orthotics

So, can you **adjust?**  
**Yes, you can!**
