

ENCORE II™

GEL LINER

- Anti-elongation matrix
- Soft comfortable gel
- General purpose

The Encore II is a soft general purpose liner designed for comfort and everyday use. The bottom third of the distal end is laminated with an anti-elongation matrix that is designed to reduce stretch and eliminate pistoning. Soft thermoplastic gel enriched with medical grade mineral oil ensures continuous comfort. The combination of advanced fabric design and gel results in a liner that provides reliable comfort and fit.
