

endurance

LOW PROFILE

The **Endurance LP** provides a combination of comfort and dynamics to users offering natural gait with less fatigue and ultimately less strain on the lower back and sound side. The split keel and heel design enhance Eversion and Inversion compliance. The Carbon fiber construction promotes conversion of weight bearing energy input into energy output.

The Endurance is light-weight, simple to assemble and has a cosmesis friendly profile which makes it easy to cover.

The Endurance LP is designed for users with long residual limbs that do not have enough clearance for the Endurance.
