

Unmatched Performance.

We're transforming multiplanar support.

HelixBand

The universal, dual strapping system supports both varus or valgus throughout the entire gait cycle.

Recommended for L-1932
(Supports both pronation and supination)
Recommended for L-2270

EAP-011 – HelixBand for FreeFlow
EAP-012 – HelixBand for Glide

Two SKUs

One for FreeFlow & one for Glide

Dual Strap for Frontal Plane Control

Varus or valgus positioning, depending on the user's needs for supination or pronation support

Customizable Positioning

Flexibility to be adjusted to the level of dynamic support needed in all 3 planes

Natural Gait Support

Designed to function alongside ligaments and muscular attachments to only provide the necessary dynamic stability and proprioception

Medial-Lateral Support, with an Off-The-Shelf AFO

Provides dynamic medial and lateral support in one visit, without custom fabrication

Size Adjustability

Trimnable cuff and liner fabric to accommodate a variety of patients

One Hand Donning & Doffing

Dual strap allows for easy application, even for low dexterity patients

Patient Friendly Materials

Skin abrasion-resistant, latex-free material designed for all day comfort

Warranty

2-Year Warranty guarantee on all carbon fiber and soft goods
