

Q LOK™ ROM

L1833/L1832

Range of motion and patellar control in a highly supportive hinged knee brace.

- SlimLok hinge: Lightweight, adjustable ROM hinge with three flexion and extension stops at 0°, 15°, and 30°
- Easily adjust hinge with included penny
- Traction strap controls patellar glide and tilt. Fits left or right leg
- Non-elastic straps control medial/lateral and anterior/posterior movement of the joint
- Rigid, aluminum uprights are flared to contour to the leg's natural shape and can be bent for additional customization (L1832)
