

# RevoSurface<sup>®</sup>

by CLICK<sup>®</sup> MEDICAL

## Better fit & comfort now.

Adjustability for your existing, rigid device.

### How it works

Your provider retrofits RevoSurface<sup>®</sup> onto your existing prosthetic or orthotic device.

When you need to adjust, turn the dial — even through your clothes.

### Who is it for?

Anyone with an ill-fitting orthotic or prosthetic device.

### Immediately improve your device.

No need to wait for a new device. RevoSurface<sup>®</sup> can be added to an existing device to instantly improve comfort and fit.

### You control your fit

You control your device. It doesn't control you.

RevoSurface<sup>®</sup> gives you the freedom to leave sock changes, disrobing, and multiple re-fittings behind.

Talk to your practitioner about how **RevoSurface<sup>®</sup>** can help you focus more on your life and less on your socket.
