

Spinal Bracing

PREMIUM UNIVERSAL SPINE BRACES

SLEEQ spinal compression braces are regarded for their exceptional comfort, patient compliance, and ease of adjustability. The innovative universal sizing adjustment and unique wing construction allow fast and accurate fitting for all body types. Pressure relief areas at the ribs and hips reduce brace migration and allow patients to maintain effective compression - even while seated.

FEATURES

- The industry's easiest universal sizing technology (fits 26"-54" waists; 62" with EXT extension panel)
- Highest quality breathable materials
- Ventilated self-molding support panels
- Wings can be angled to optimize fit for all body types
- Patented and made in the USA

DUAL-ZONE TECHNOLOGY

The SLEEQ Dual-Zone Technology is our unique approach to the brace wings. An inelastic center section provides stabilizing compression, and unparalleled comfort is achieved by mild stretch relief at the ribs and hips. Effective compression can be maintained, even while seated, when there is more pressure on the lumbar anatomy.

- Non-elastic wing reinforcement maximizes support
- Pressure relief zones at ribs and hips allow comfortable compression
