

4-Hole Spacer Plates

Spacer plates provide extra height when needed as well as offset or angular offset in medial/lateral or anterior posterior orientations.

Aluminum 4-hole Spacer Plates may be installed in either anterior/posterior or medial/lateral orientation. Available in a 12 mm offset, a five degree reverse angle offset and a five degree forward angle offset. These components are useful in dynamic alignment situations when additional angular adjustment is required. These plates may be left in the definitive prosthesis if desired. Screws included.

LIMBLOGIC® VACUUM PLATE

The LimbLogic Vacuum Plate is suitable for instances when there is insufficient clearance to mount the LimbLogic pump directly below the socket. The plate allows practitioners to relocate the controller while maintaining the in-line design of a prosthesis. Additionally, practitioners may use the plate to retrofit existing vacuum sockets to use with LimbLogic.
