

Lace Align™ Spinal Orthoses

Keeping you in
your comfort zone.

Spinal Orthoses

Product Number	S/M	L/XL
Lumbar Orthosis (LO)	35-3111	35-3113
Suggested Billing Code: L-0627 (Custom Fit), L-0642 (OTS)		

Lumbosacral Orthosis (LSO)	35-3201	35-3203
Suggested Billing Code: L-0631 (Custom Fit), L-0648 (OTS)		

Lumbosacral Plus Orthosis (LSO PLus)	35-3211	35-3213
Suggested Billing Code: L-0637 (Custom Fit), L-0650 (OTS)		

Sizing Guide	S/M	L/XL
	30" - 45"	40" - 60"

Measurement taken from waist or hip circumference. Use the larger of the two circumferences when selecting brace size.

Accessories

A. Replacement Back Panel (LO Model)	35-3901
B. Replacement Back Panel (LSO or LSO Plus Model)	35-3902
C. Replacement Side Panels, pair (LSO Plus Model)	35-3903
D. Lace Align Extension Kit (15")	35-3904
E. Gel Pouch with 9"x11" Gel Pack	35-3911
Gel Pouch Only	35-3910
9" x 11" Gel Pack (each)	72-7006
9" x 11" Gel Pack (box of 10)	72-7006-010

Lace Align™ Spinal Orthoses

Keeping you in
your comfort zone.

CORFLEX®
Designed for life.

Introducing Outlast® proactive
heat management technology

Power Pull™ System

The key to an effective back brace is delivering support to the spinal column. Our Power Pull System allows patients to achieve this with minimal effort, stabilizing internal structures and helping reduce intradiscal pressure through circumferential compression.

CORFLEX®

Designed for life.

Corflex® and Outlast®

Keeping you in your comfort zone.

How does Outlast Work?

Outlast technology delays the onset of sweat, proactively buffering temperature swings to help prevent perspiration. This patented phase-change material absorbs, stores and releases excess body heat to maintain balance, helping the body minimize temperature swings to conserve metabolic energy.

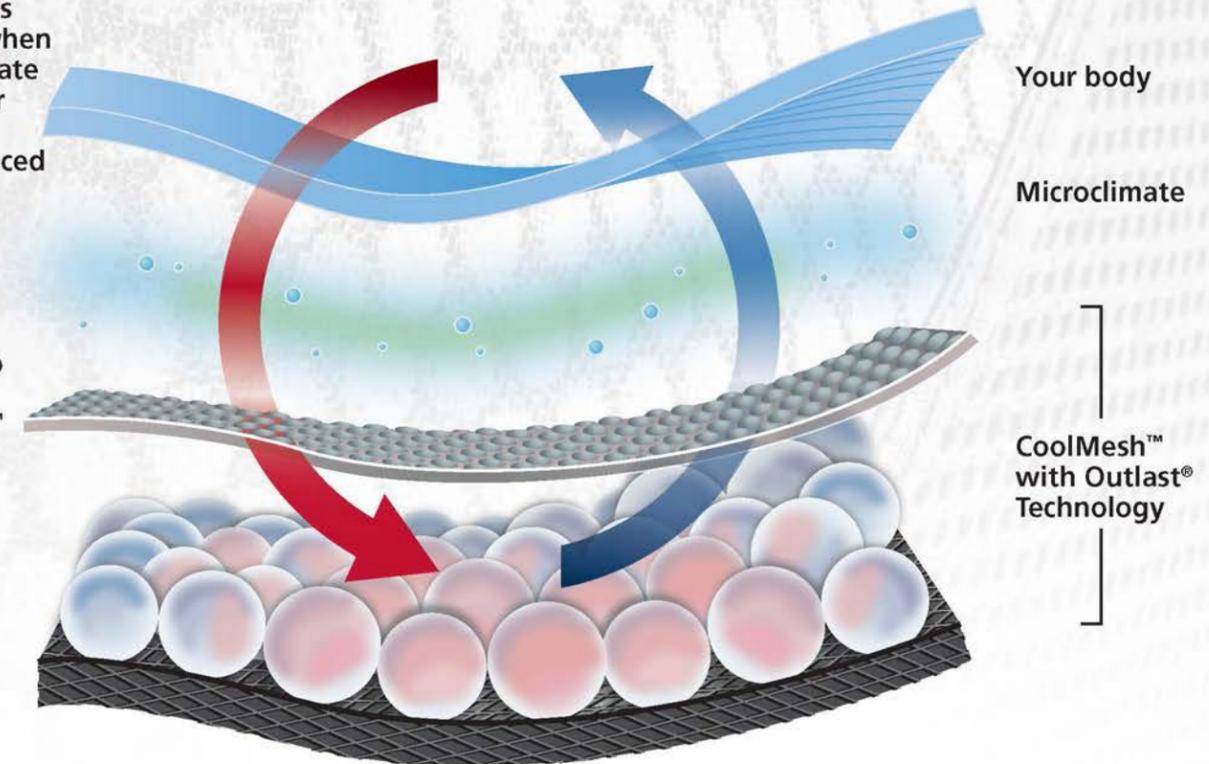

Creating the ideal comfort zone...

We've coupled the proactive benefits of Outlast with our reactive CoolMesh™ fabric to deliver the ultimate in orthopedic brace comfort. Outlast starts working the minute you apply the brace, keeping you cool and dry. As your activity level increases, our breathable CoolMesh steps in to help wick moisture and encourage airflow, creating the ideal comfort zone.

An ideal skin temperature is maintained when the microclimate between your skin and the brace is balanced

Excess heat generated by the body is absorbed into the Outlast® Thermocules™

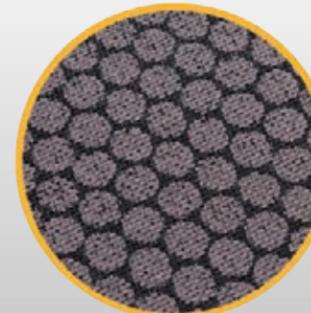

Breathable CoolMesh™ helps wick moisture and encourage airflow

Lace Align™ Spinal Orthoses

> Designed to stabilize and decompress the spine in patients recovering from surgery or injury, this innovative brace incorporates Outlast®, a hi-tech fabric that provides proactive temperature regulation, managing heat and moisture for all-day comfort. Removable posterior panel allows “step-down” to a traditional back brace, offering moderate support and increased patient value. Also available is an optional Gel Pouch that attaches easily to deliver cold or hot therapy following surgery, injection or injury.

> **Indications:** lower back pain, sprains or strains, spinal stenosis, spondylosis, spondylolysis, spondylolisthesis, degenerative disc disease, bulging or herniated discs, burst fractures, facet syndrome and post-operative stabilization following laminectomy, foraminotomy, IDET procedures, discectomy, fusion or decompression.

CoolMesh™ with Outlast®

Proactively balances temperature swings to help prevent sweating and improve patient compliance

CoolMesh™ Fabric

Breathable mesh helps wick moisture and encourage airflow keeping you cool and dry

Sizing Guides

Embroidered sizing marks take the guesswork out of belt length adjustment

Rigid Back Panel

Removes easily for step-down modularity and can be shaped with a heat gun for added customization

Universal Sizing

Two sizes fit waist circumference ranges of 30”-60” using the Lift-and-Slide adjustment – no trimming required

Power Pull™ Closures

Durable molded pull tabs allow the patient to effortlessly apply and adjust the desired level of compression

Hand Loops

Located on both front panels to promote independent brace application and removal when grip strength is impaired

Removable Side Panels

Included in the LSO Plus model for added lateral stabilization

Integrated Anterior Panels

Shaped and slotted to help eliminate irritation when sitting or bending

Lumbar Orthosis (LO) L0627/L0642

Stabilizes from L1 through lumbosacral junction

Lumbosacral Orthosis (LSO) L0631/L0648

Delivers greater stabilization, extending from T9 to SC junction

Lumbosacral Plus Orthosis (LSO Plus) L0637/L0650

Delivers motion control in multiple planes with the addition of movable lateral side panels
